How to register for EPS

Talk to a member of our staff and let them know that you want to move to electronic prescriptions. We'll do the rest. It's that easy.

The benefits of EPS:

- Free and easy to use
- Your prescription will no longer need to be collected from the surgery, saving you and pharmacy staff time
- Secure and confidential
- Good for the environment as it helps to reduce the paper we use
- Allows your prescription to be tracked at all times

Exciting changes are being made to the way prescriptions are issued in Wales.

We are testing a new service which will send your prescription by computer from your GP practice to us. This will save you time and help us reduce the need for most paper prescriptions, which will be good for the environment.

Wellington Road Pharmacy and Lakeside Medical Centre are taking part in the first test in Wales to use this new Electronic Prescription Service (EPS). It will be introduced gradually across Wales in the near future.

This means that from Autumn 2023, Lakeside Medical Centre patients who usually use our pharmacy can choose to have prescriptions issued electronically, removing the need for a paper prescription.
